Abstract

[illegible][illegible]

Insert the **MS-DOS** floppy into the first drive, and into the second drive the **MS-DOS** floppy that you have formatted.

1. If you are using your computer's **CD-ROM** drive, the computer must be able to read the **MS-DOS** file.

Insert your **CD-ROM** into the computer's **CD**.

If your computer has a hard-disk drive you should use **MS-DOS** 5.0 or greater. Update your hard-disk drive to the latest version of **MS-DOS** by using the **MS-DOS** floppy and **MS-DOS** Setup.

Insert the **MS-DOS** 5.0 floppy into the first drive. Remove the **MS-DOS** 5.0 floppy from the second drive. Press any key to continue.

Press the **CD** key, and press **MS-DOS** Setup. Insert the **MS-DOS** 5.0 floppy into the second drive. The game should start.

BASIC SUPPORT STRATEGIES

The team automatically select the direction you put the robot in.

Forwarders / Backwarders - Forward and Backward moves all use the same physical move.

My strategy requirements - put the robot in the direction you want to move, i.e. to move left, put left, etc.

Supporting movement/turning strategies - all moving for the support team's moves

Robot - A robot support team is providing the robot and the support technology.

OPTIMAL ESTIMATION (PART 1)

For 2D: Design and Non-2D sensors

2D/2D - Use the sensor to estimate range and bearing of the target (2D coordinates).

2D/1D - When stopped to reduce up and down components (range and bearing) of the target. When the target is moving.

OPTIMAL ESTIMATION (PART 2)

For 2D/2D and 2D/1D sensors

2D/2D - Use the sensor to estimate range and bearing of the target (2D coordinates).

2D/1D - When stopped to reduce up and down components (range and bearing) of the target. When the target is moving.

OPTIMAL ESTIMATION (PART 3)

For 2D/2D and 2D/1D sensors

2D/2D - Use the sensor to estimate range and bearing of the target (2D coordinates).

2D/1D - When stopped to reduce up and down components (range and bearing) of the target. When the target is moving.

The first question of the paper concerns the effect of the α -value on the results. The paper considers the nature of the question in general, presents a table of the results of the analysis, and then discusses the results in detail. A final section discusses the implications of the results for the analysis of the data.

Because of the disruptive character, we should expect a high proportion of the total employment to be in the service sector, and, in fact, this is the case. The total population of the United States is 230 million, and the total employment is 130 million. The total population of the United Kingdom is 55 million, and the total employment is 25 million.
